Q&A

What is Remote Testing? Remote testing is an additional testing option built to accommodate testers who prefer to sit for their NCCT examination in the comfort of their own home or office, and for institutions who may have trouble finding a proctor or testing facility. Testers use their own technology and space to sit for the exam. The exam is the same for either testing option.

What is needed for Remote Testing? Significant testing space and technology requirements must be met to qualify for Remote Testing. Please see the detailed information on page 4.

Can my school/organization participate if I have a billing code? Yes, there are options for billing the exam only, the exam and remote testing fee, or no billing. If the school/organization is already validated through NCCT they must contact a testing rep to set up billing options. If your school does not yet hold validation with NCCT, please contact our office for assistance at (800) 875-4404.

What does Remote Testing cost? The cost for the exam is the same, but there will be an additional \$44 remote testing fee.

Is the exam proctored? Yes, there is a live remote proctor that is assigned to each exam that is scheduled.

I have more questions, who can I call? Please reach out to your NCCT testing representative or our call center at (800) 875-4404.

Notice of Non-discrimination and ADA Accommodation

NCCT does not discriminate against any candidate based on race, creed, color, national origin, sex, religion, disability, marital status, or age. NCCT will provide reasonable and appropriate test accommodations in accordance with the Americans with Disabilities Act (1990) for individuals with documented disabilities who request and demonstrate the need for accommodation on a case-by-case basis as required by law. ADA regulations define a person with a

disability as someone with a physical or mental impairment that substantially limits one or more major life activities. NCCT requires documentation to validate that the individual is covered under the ADA as a disabled individual to allow accommodations to be specifically matched with the identified functional limitation, in order to provide equal access to test functions for all examinees. Certain job competencies may be considered essential to the professional practice in the field and some accommodations for eligibility or testing may not be available, as determined by NCCT.
